Fovere Acoustic

Fovere to czołowy dostawca akustycznych rozwiązań dla przestrzeni publicznych. Firma posiada najbardziej rozległe doświadczenie w branży wnętrz publicznych. Panele akustyczne są produkowane z tworzywa PET, z czego 70% materiału pochodzi z recyklingu, a pozostałe 30% składa się z czystego PET, biomasy, stabilizatorów i pigmentów. Panele te mają grubość 12 mm i wymiary 120/300cm. Są produkowane w Polsce. Każdy z oferowanych materiałów posiada certyfikaty potwierdzające trudnopalność i właściwości akustyczne. Nasza misja to inspirowanie Podczas gdy Wy tworzycie, My odpowiadamy za realizację. Nasze rozwiązania zawsze są dostosowywane do indywidualnych oczekiwań klienta. Zapraszamy do zapoznania się z naszym portfolio i do kontaktu w przypadku dodatkowych pytań czy wsparcia.

Fovere is a leading provider of acoustic solutions for public spaces. The company has the most extensive experience in the public interiors industry. Our panels are manufactured in Poland, basing on PET materials. 70% of the product comes from recycled PET and remaining 30% consists of pure PET, biomass, stabilizers and pigments. Our panels are 12 mm thick and have basic size of up to 120x300 cm. Fovere range has all the necessary certifications for the European market, both in flame retardancy and acoustics. As our mission is to inspire, you create and we are responsible for implementation. Fovere solutions are always tailored to the individual expectations of the client. Take a look at our portfolio and feel free to contact us if you have any further questions or require support.

Gładkie panele i filce

Plain panels and felts

Każdy z dostępnych materiałów może służyć jako jednolita i subtelna powierzchnia ściany lub wykończenie w formie lamperii.

Available materials can serve as a uniform and subtle wall surface as well as panelled finish

Panele ażurowe

Openwork panels

Poprzez wycinanie transparentnych motywów w panelach oraz filcu z rolki, jesteśmy w stanie stworzyć trójwymiarową okładzinę ścienną, na przykład wiszący panel z ażurowym wzorem. Motyw można wyciąć w dowolnym fragmencie. Oferujemy zarówno gotowe projekty, jak i wzory tworzone na specjalne życzenie klienta.

We can create a 3D wall cladding by cutting out transparent themes in panels as well as from the felt on the roll. Basic example is a hanging panel with an openwork pattern. The cutting can be performed in any selected section of the product. We offer both ready-to-use designs as well as custom-made designs.

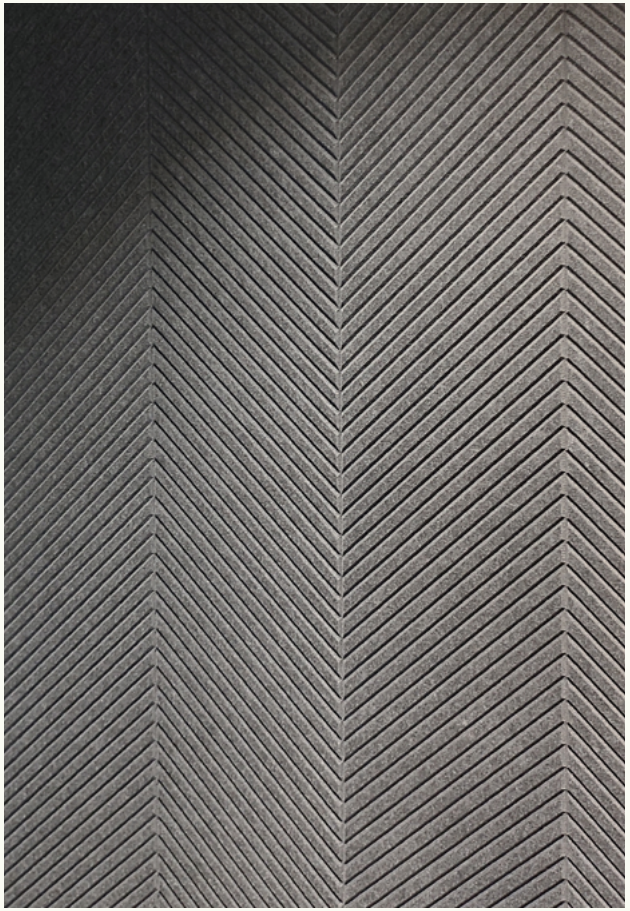

Panele V-cut

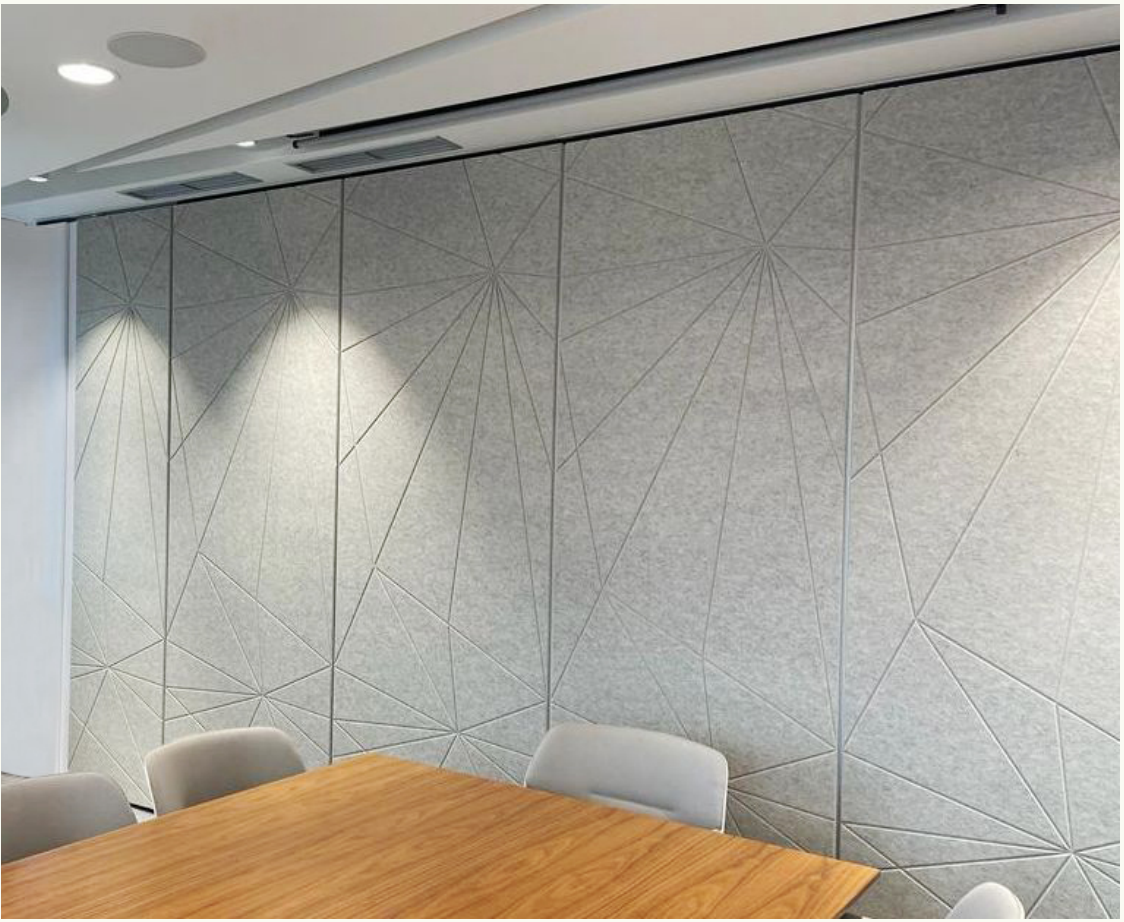

V-cut panels

Technika grawerowania w panelach, w formie litery V o zróżnicowanym kącie nachylenia. Możliwe jest także grawerowanie paneli z obu stron.

Panel engraving technique in the form of a V-shape with different angles available. Engraving can be performed on one side and on both sides of the panel.

Lamele

Lamellas

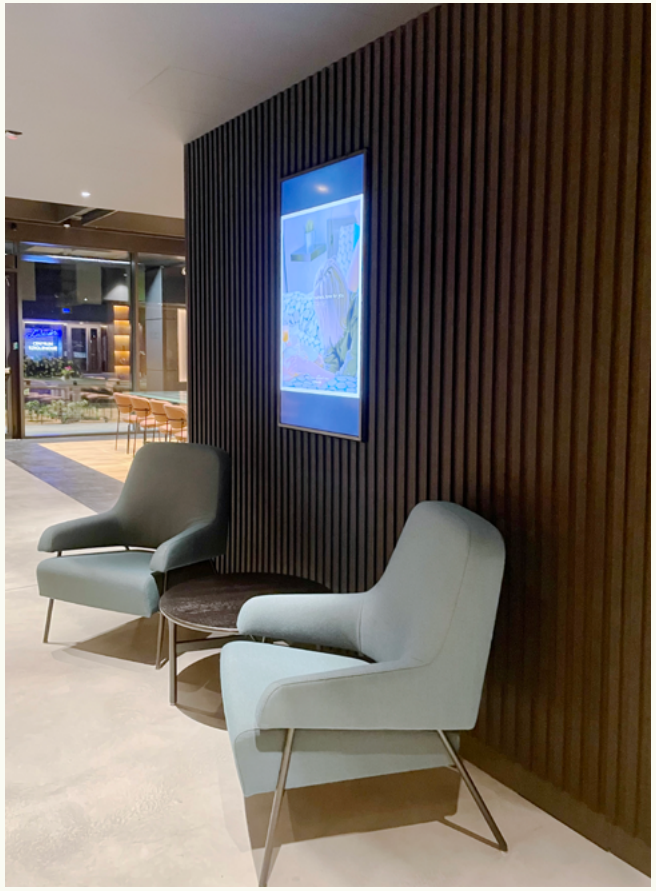

Poprzez specjalistyczne cięcie i łączenie, jesteśmy w stanie osiągnąć wygląd lameli. Zarówno ich szerokość, jak i kształt można dostosować według indywidualnych preferencji.

Through specialised cutting and merging, we are capable of achieving the appearance of lamellas. Both their width and shape are customisable to individual preferences.

Parawany

Screens

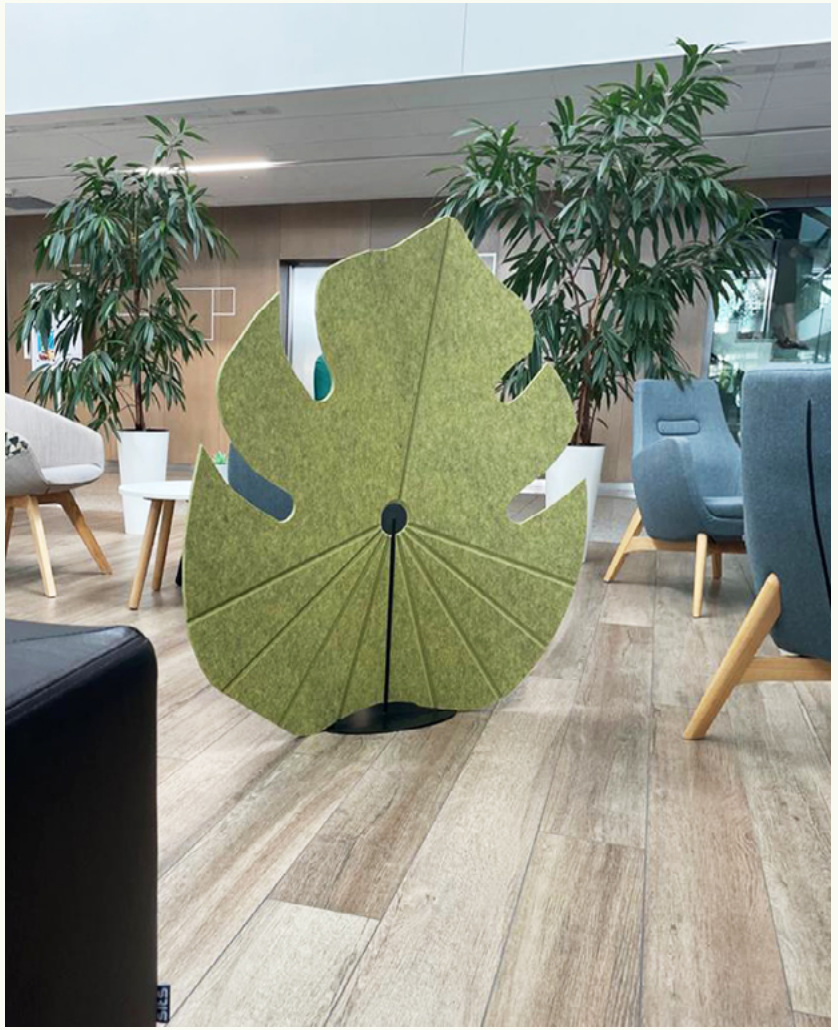

Dla osób poszukujących ruchomych rozwiązań akustycznych, proponujemy mobilne przegrody, które w dowolnym czasie można przestawić lub schować.

Those searching for mobile acoustic solutions can select from our range of portable screens that can be moved or retracted at any time.

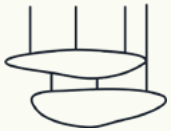

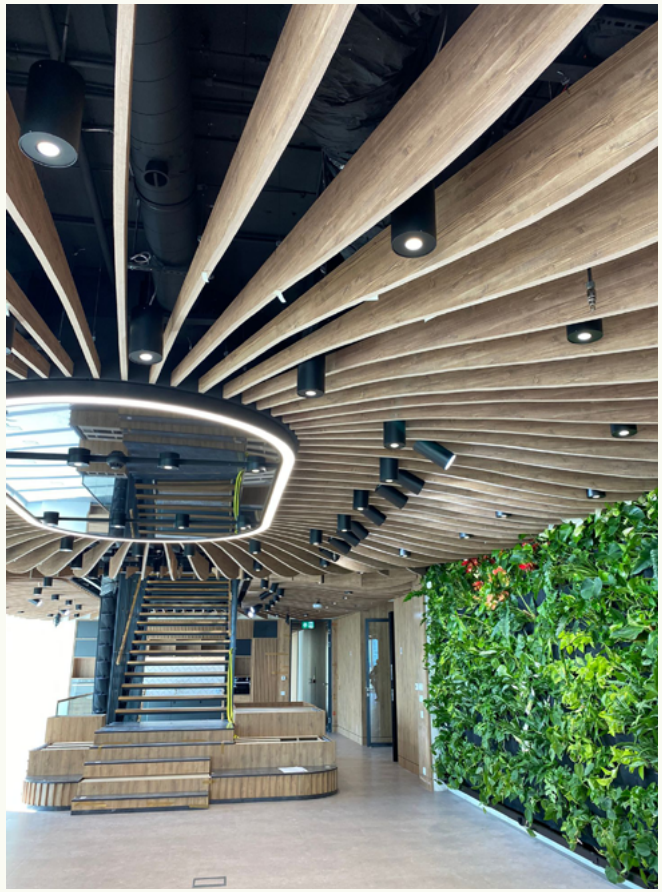

Indywidualne rozwiązania

Customised solutions

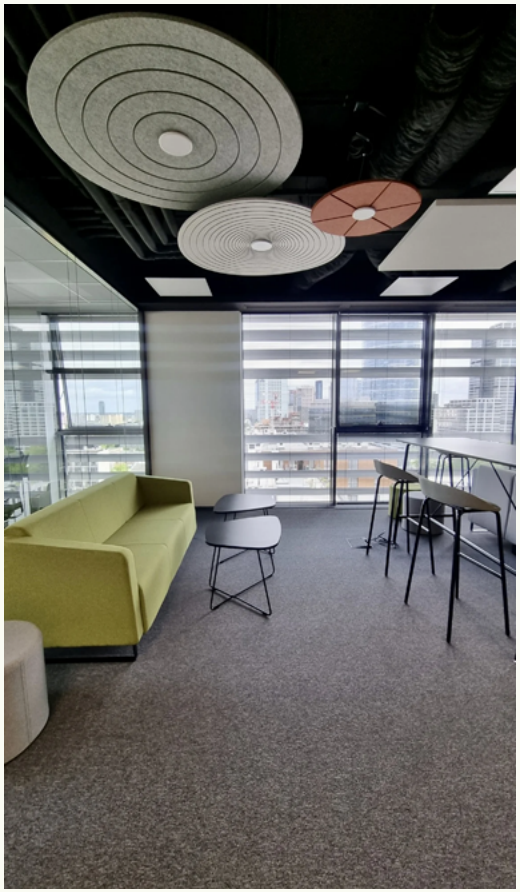

To opcja, która ceniona jest najbardziej.
Ty kreujesz koncepcję, a my ją realizujemy.

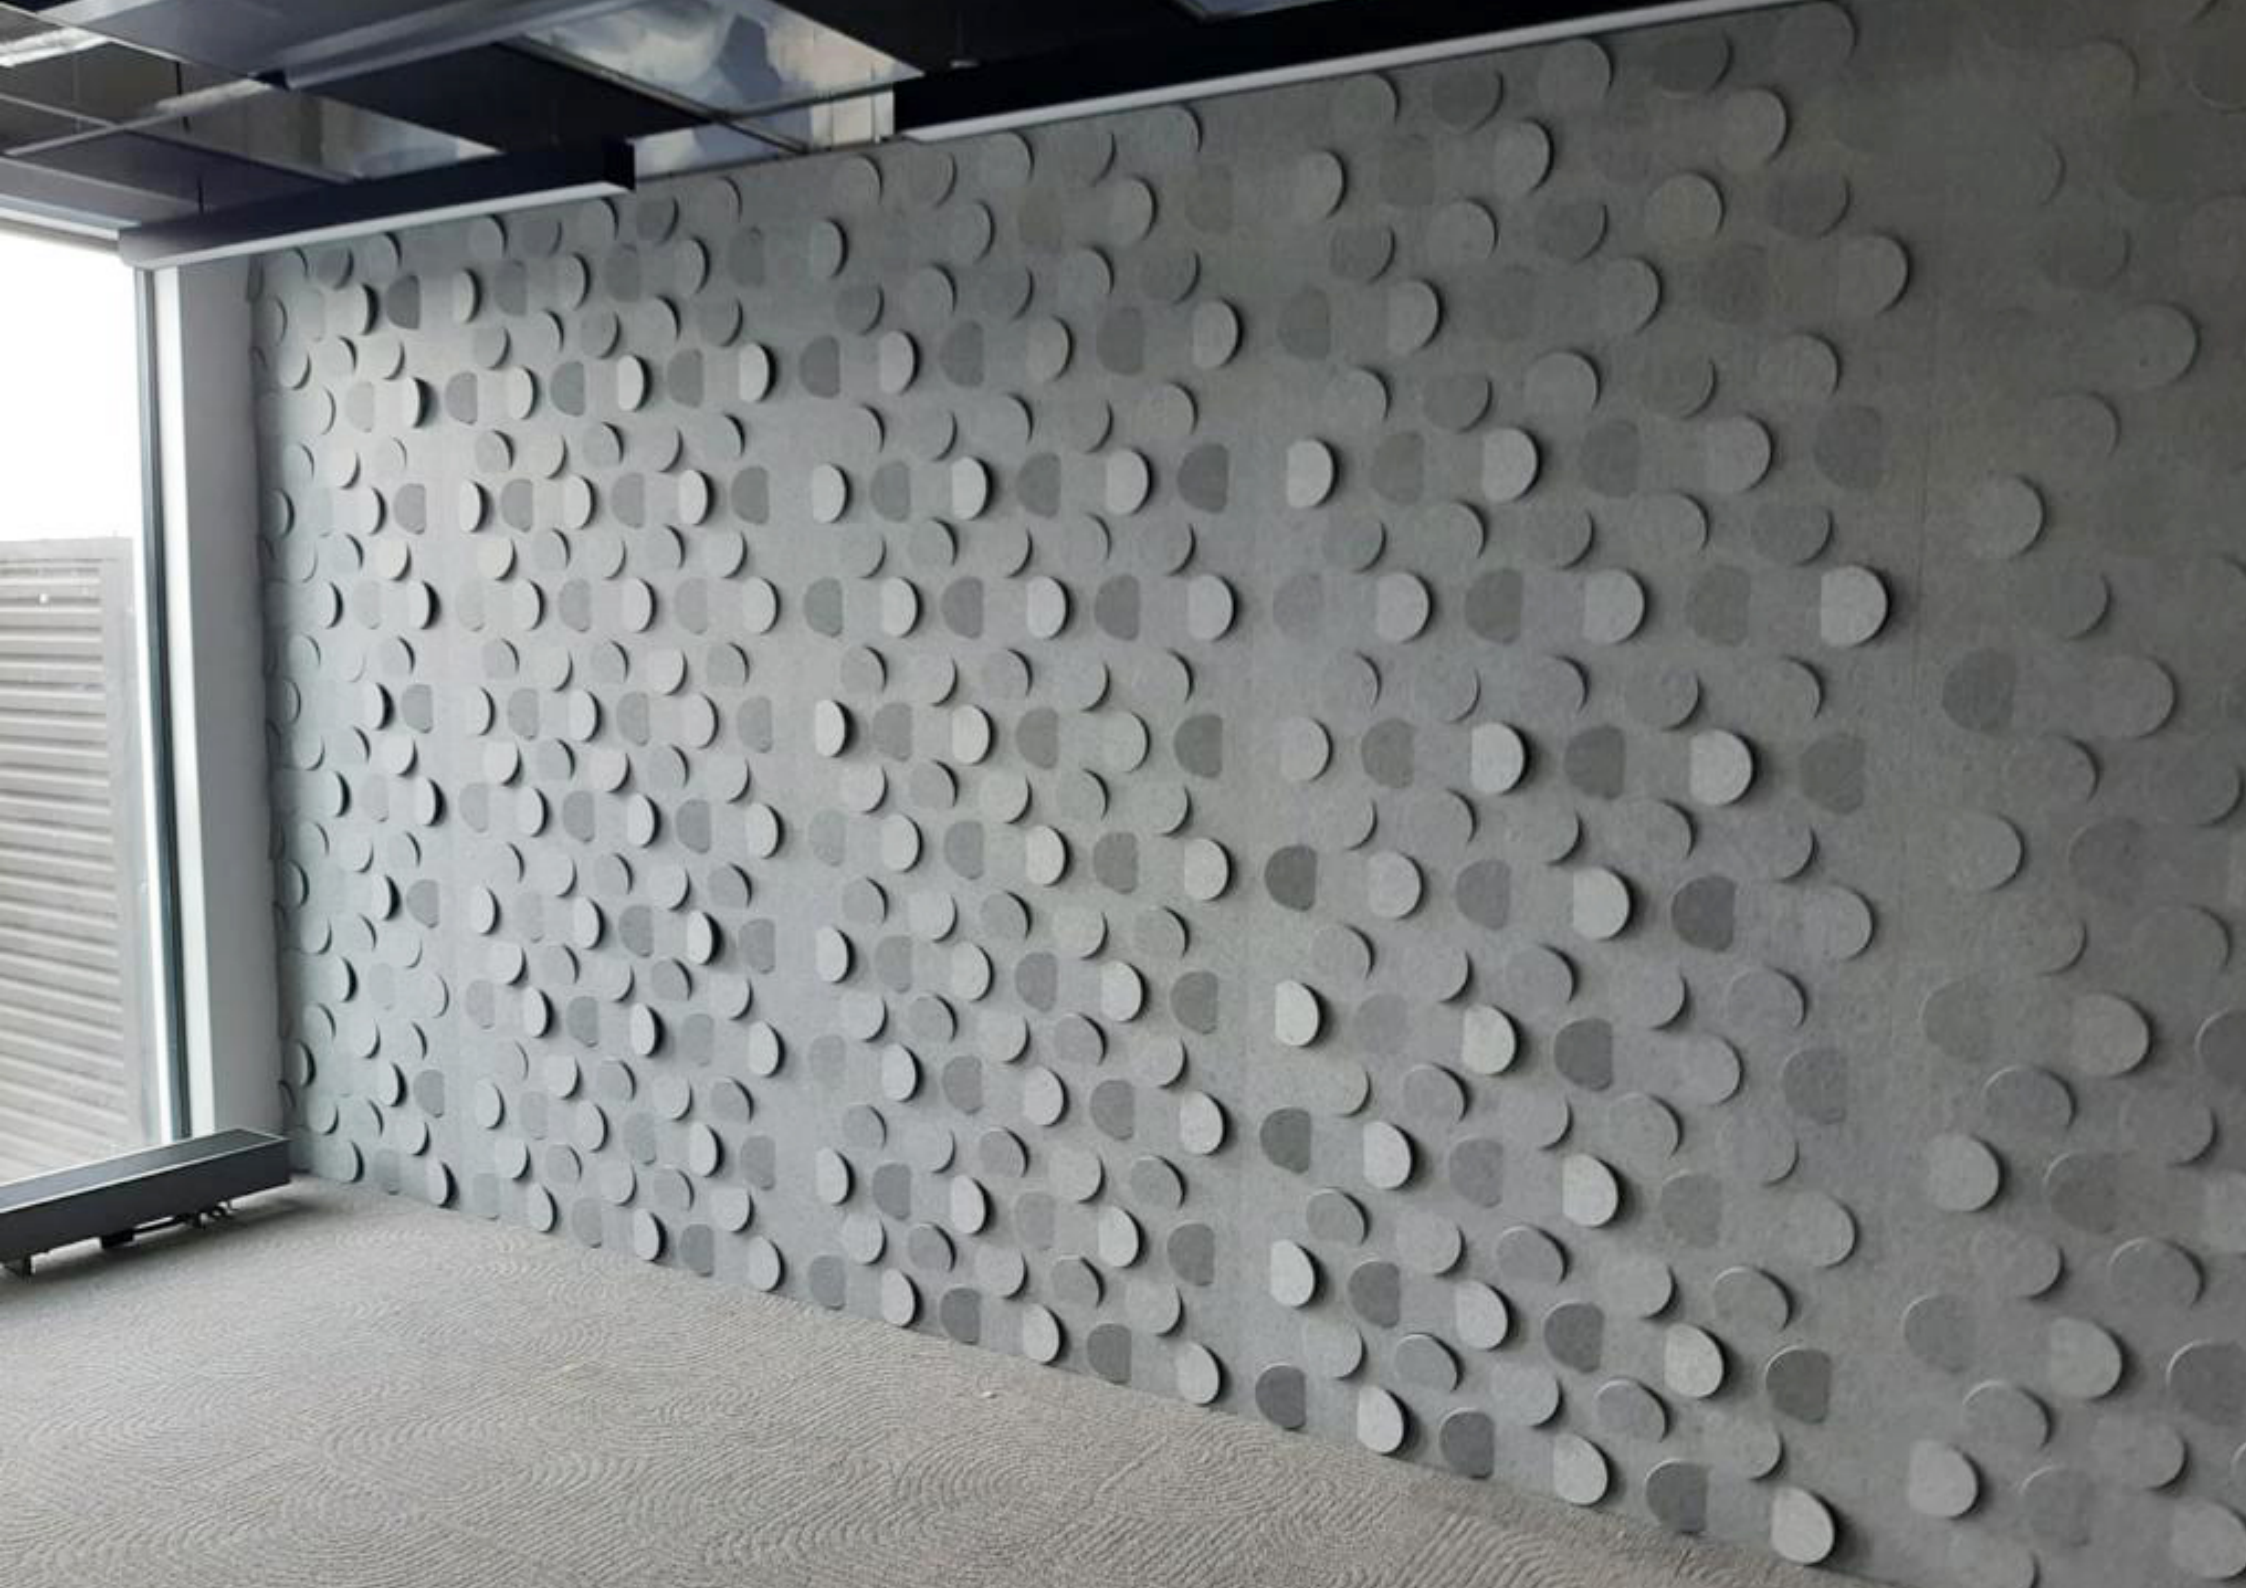

You create your own concept, we bring it to life.
This is the most valued option with capability
of meeting most individual expectations.

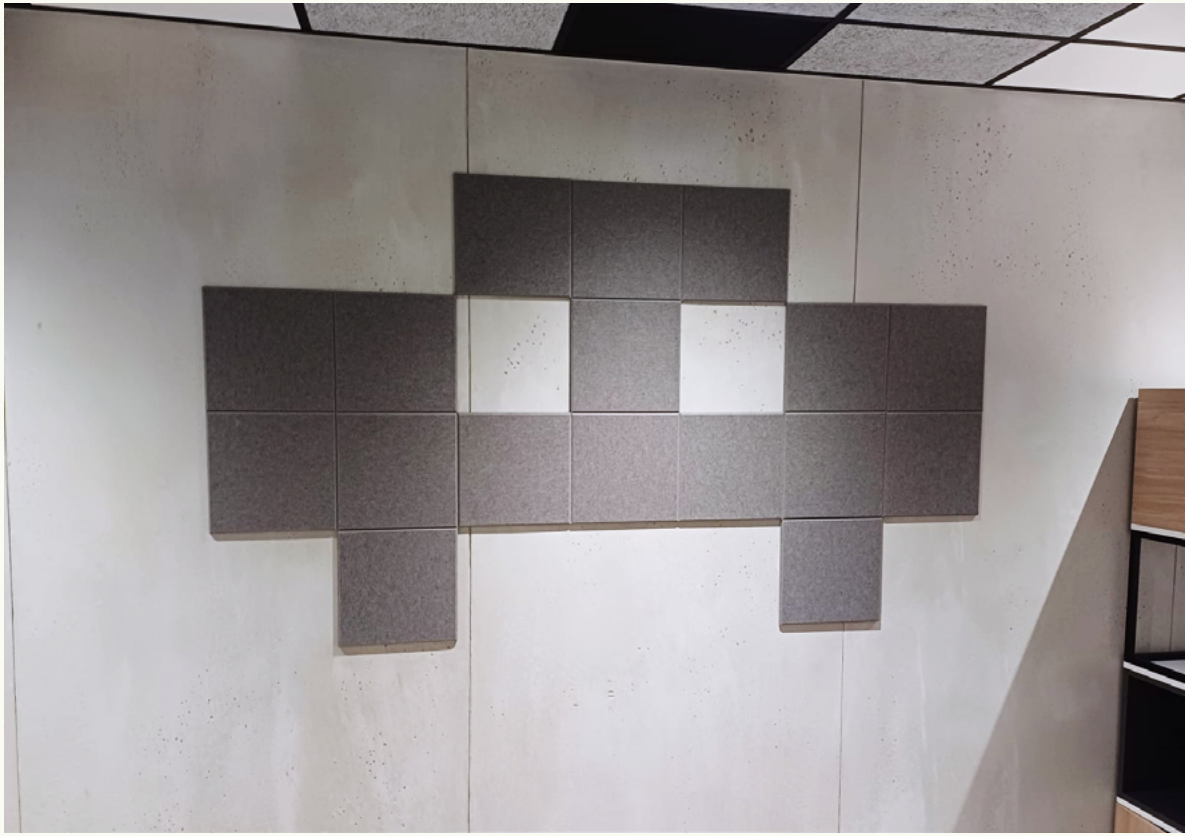

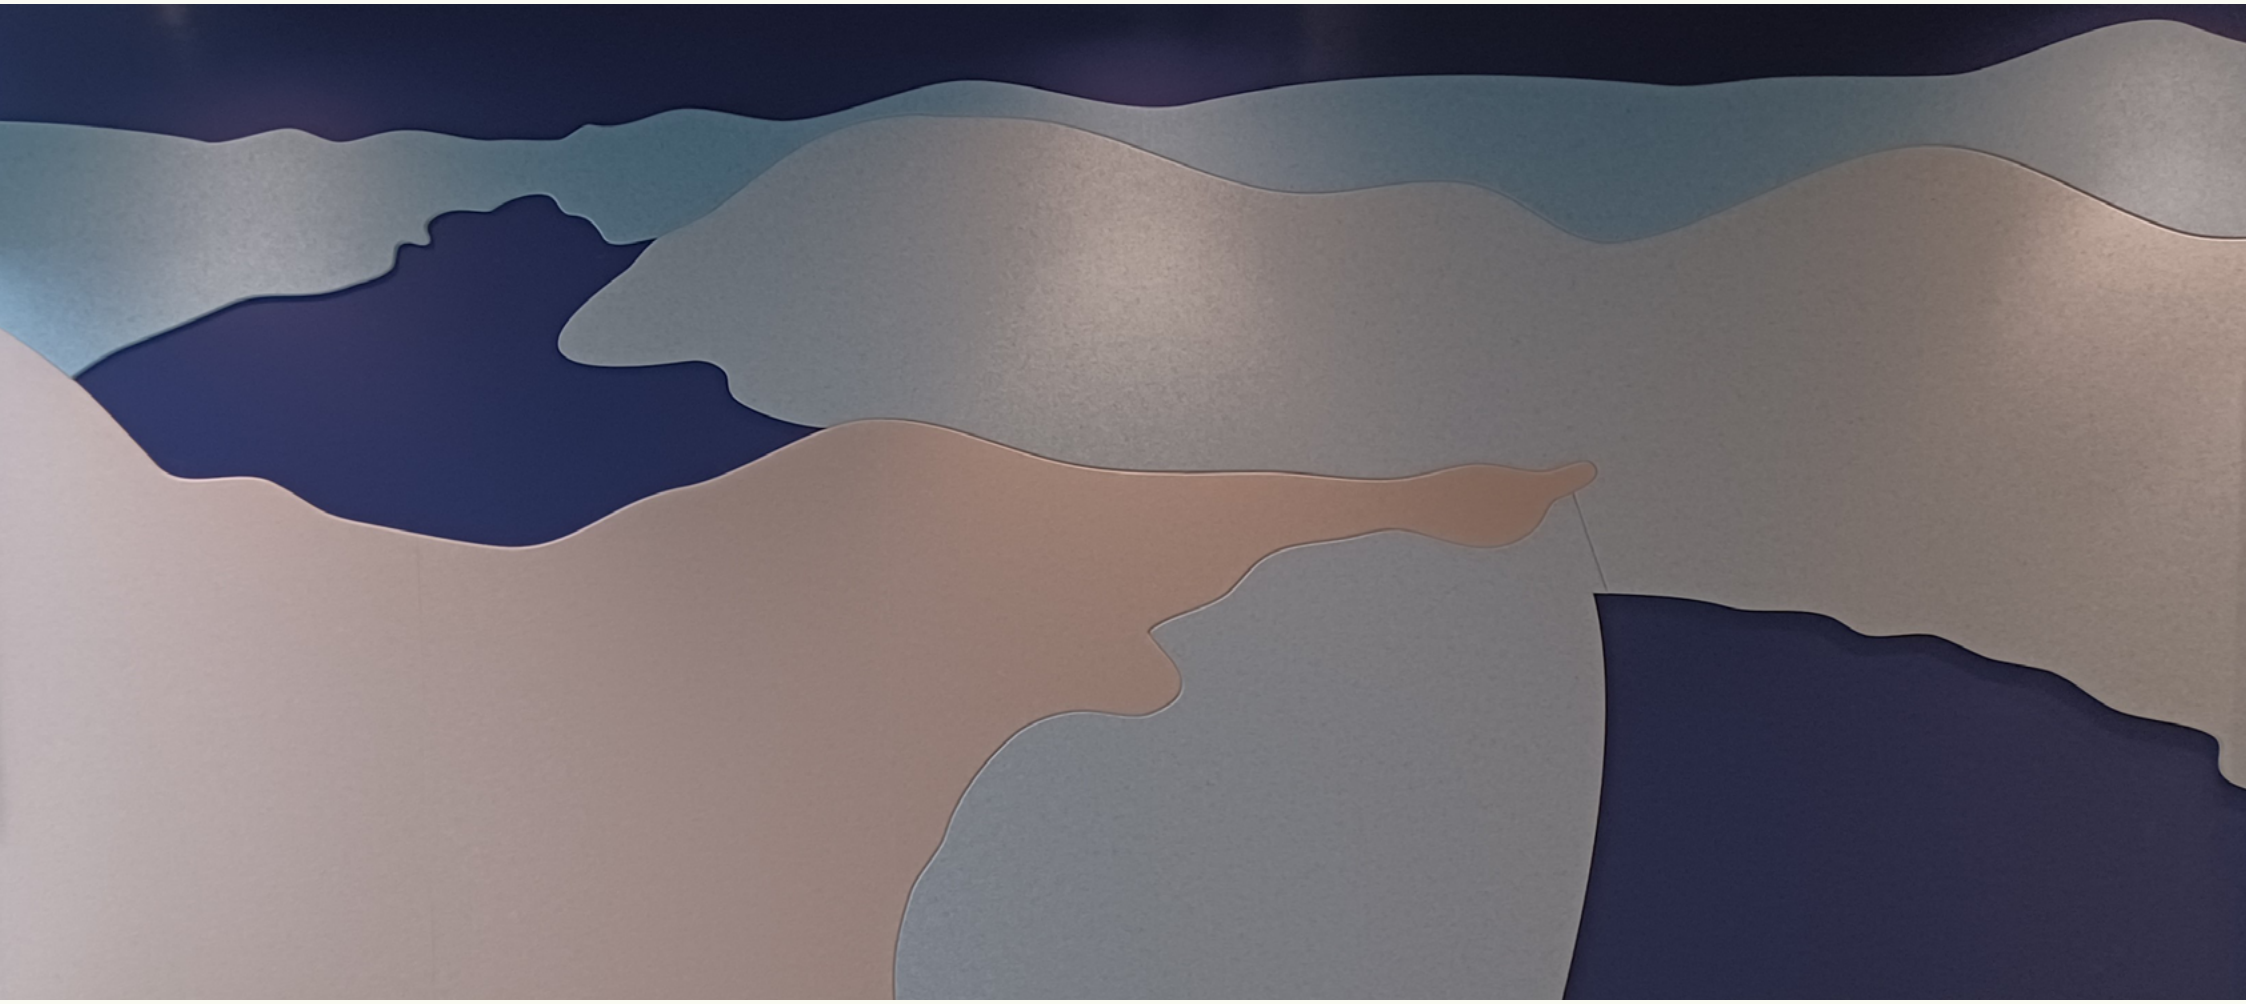

COLLABORATION

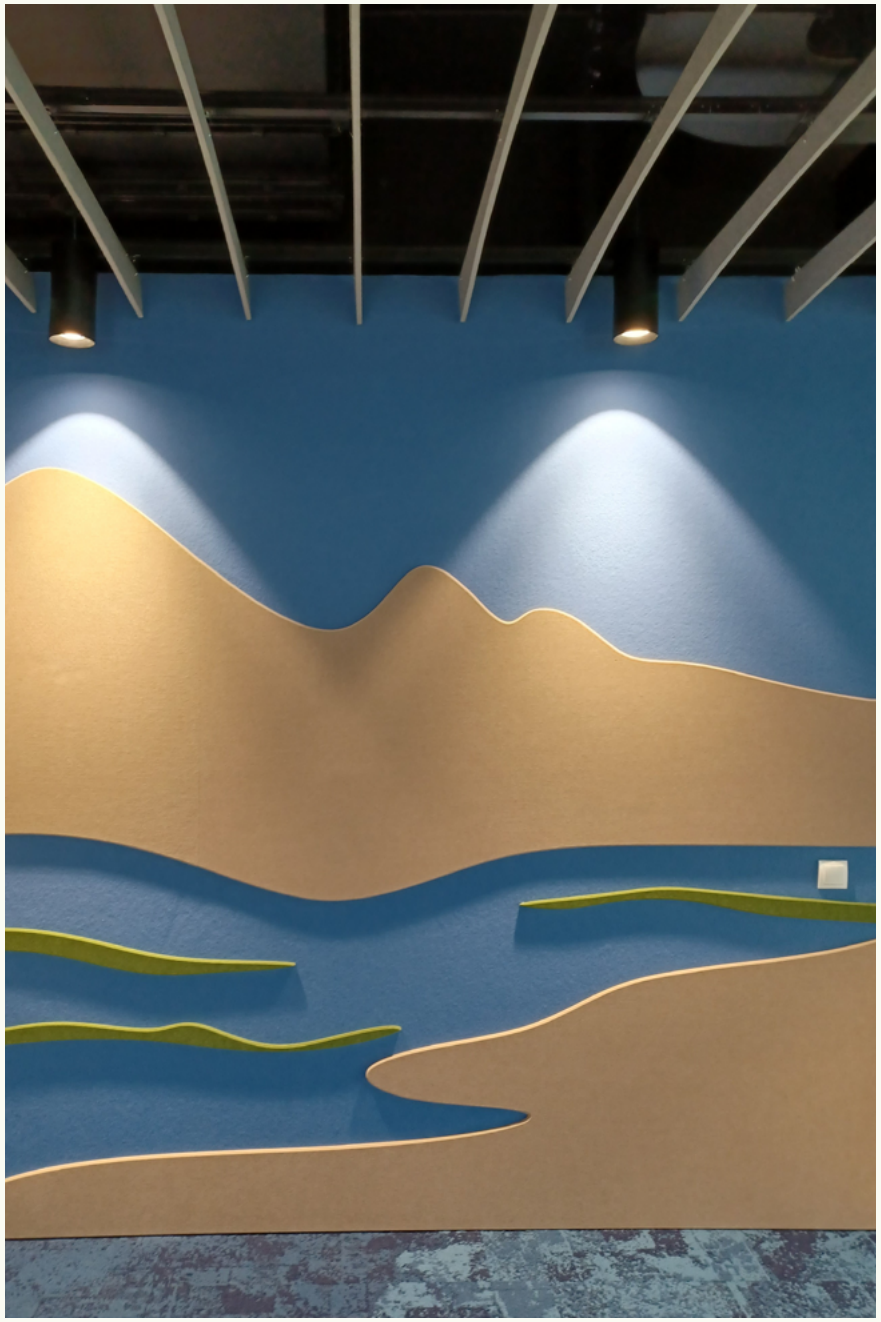

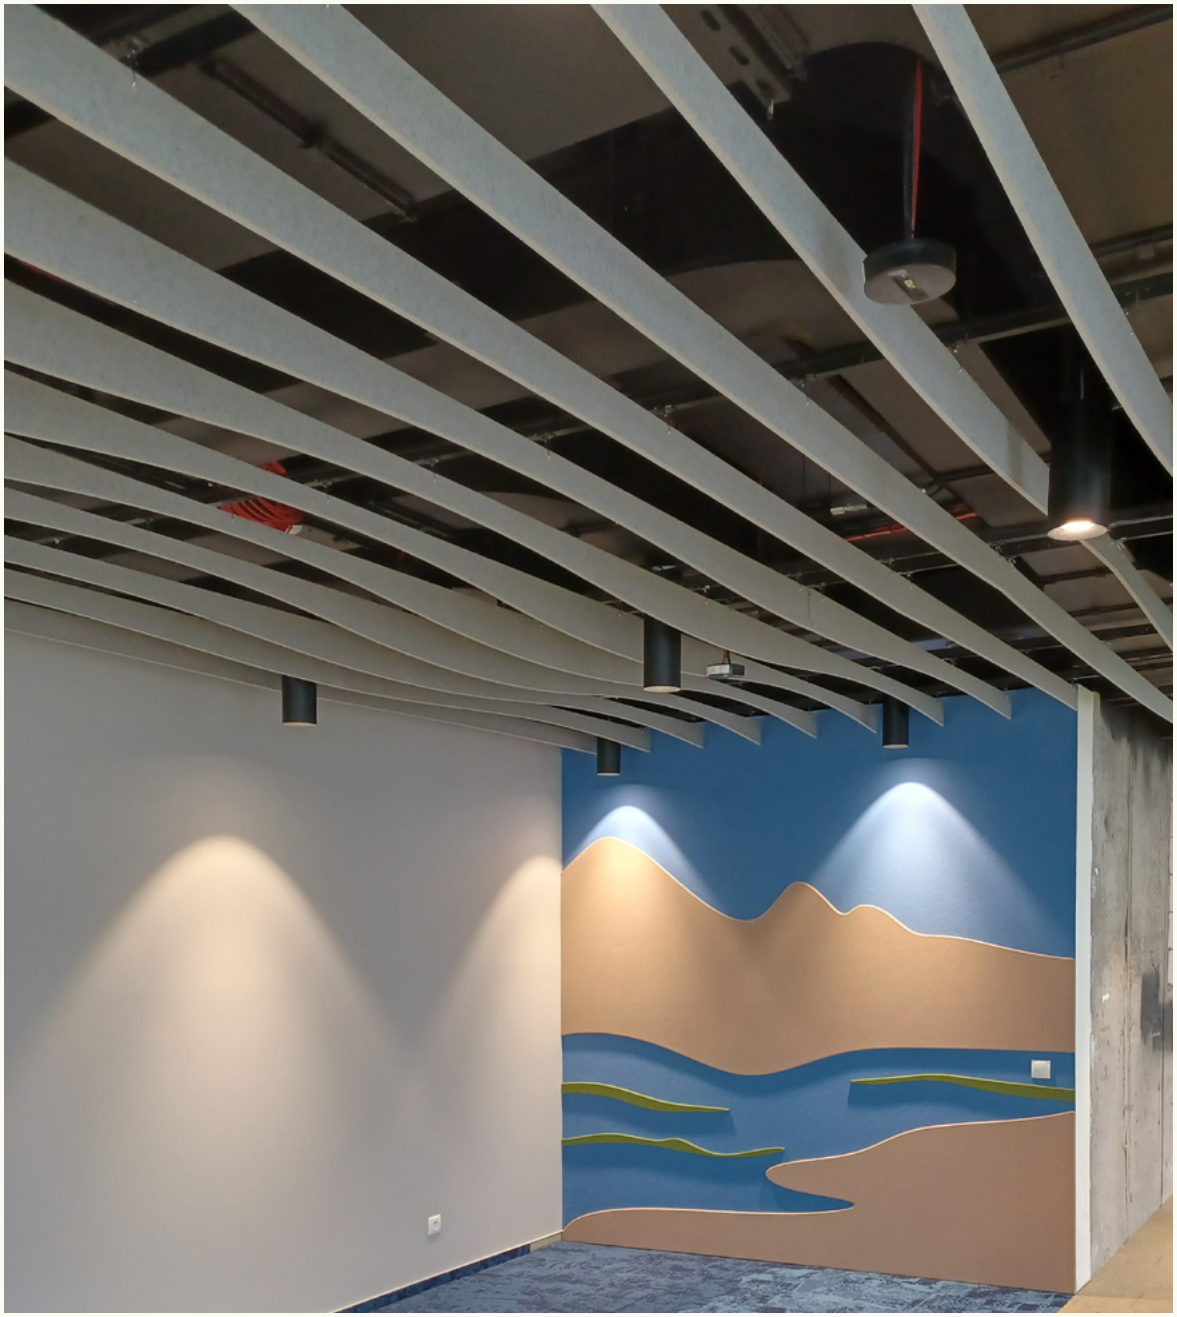

$\chi = \beta T$

$\omega = \sqrt{\omega_0^2 - \beta^2}$

$E = mc^2$

$h\nu = A$

$W = |\Psi|^2$

$\cos(\omega t + \alpha)$

$R = \frac{W}{t \cdot S}$

$T = \frac{2\pi}{\sqrt{\omega^2 - \beta^2}}$

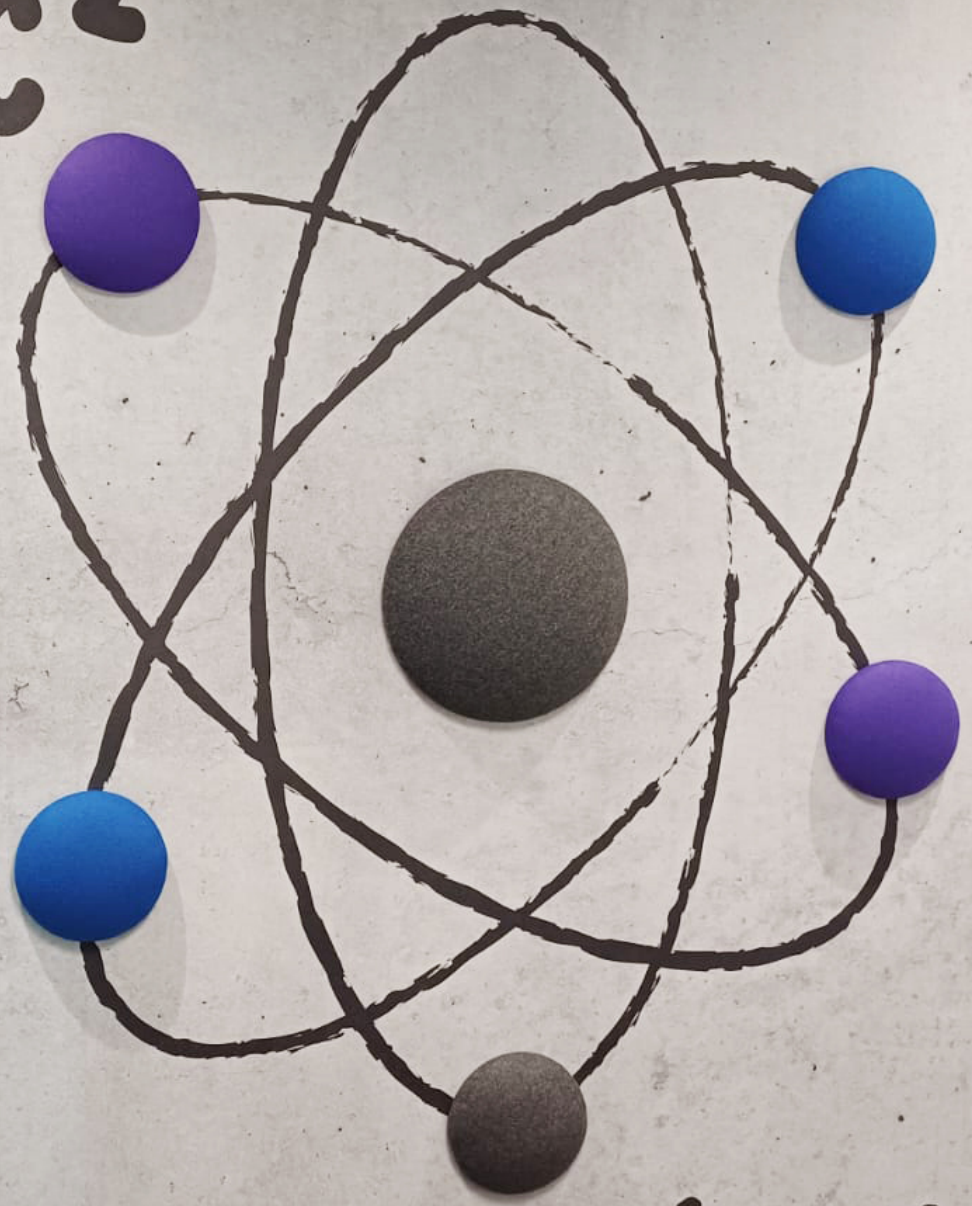

$p = \frac{1}{c}\sqrt{W_x(W_k +$

$\lambda = vT$

$k = \frac{2\pi}{\lambda}$

$\mathcal{E}_{св} = \Delta mc^2$

$A\cos(\omega t - kx)$
